Consideration of Individual Circumstances

Staff at Gordonvale State High School take into account students' individual circumstances, such as their behaviour history, verified disability, diagnosed mental health and wellbeing, religious and cultural considerations, home environment and care arrangements when teaching expectations, responding to inappropriate behaviour or applying a disciplinary consequence.

In considering the individual circumstances of each student, we recognise that the way we teach, the support we provide and the way we respond to students will differ. This reflects the principle of equality, where every student is given the support they need to be successful. This also means that not everyone will be treated the same, because treating everyone the same is not fair.

Our teachers are also obliged by law to respect and protect the privacy of individual interest of other students, staff and parents to know what punishment another student disclose or discuss this information with anyone but the student's family. This applies to your child. You can be assured that school staff take all matters seriously and will ensure that parents and students will respect the privacy of other students and families.

TOBACCO POLICY

If you have concerns about the behaviour of another student at the school, or the way our staff have responded to their behaviour, please make an appointment with the Principal to discuss the matter.
